TO WHOM IT MAY CONCERN

Re: Planning permission application for the proposed development of the site of the new Children's Hospital of Ireland at the Mater Misericordiae University Hospital campus Eccles Street, Dublin 7.

I wish to object to the proposed development of the New Children's Hospital the reasons for my family are:

- Height of building – no consideration for the community that live in the area – less daylight and because of the proposed height would mean are energy bills going up substantially. My concern is this is a 14 storey building which means the residents will be in the shade everyday all day.
- Noise pollution – I believe there will be a helicopter pad on top to transport children to the hospital what about the children that live in the community who need a goodnights sleep. I don't want helicopters flying over my house at all hours of the night and we can't get a nights sleep.
- Property – when my family purchased our home in 1992 I didn't buy to have a large extension to the Mater Hospital and my concern is the height of the hospital – we pay our mortgage what I don't want in the future that our property in the area is devalued and nobody would live in the area.

- Parking - as it is at the moment we pay Dublin City Council to park in the area but I believe the carpark has closed at the Mater Hospital. I don't want where people who live in the area can't park and people visiting the hospital having taking our slots. I don't understand with the new hospital there was not underground parking for the public.

Please take on board the concerns of my family all these points Height of Building, Noise Pollution, Devaluing Property Prices, Parking etc.

Kind Regards

Patricia O'Connor
